

Now you can call and be called even easier using the Multi-Link **Perfectel Phone** - specially designed to work with **Skype™**. Multi-Link Perfectel Phone is a fun, inexpensive and easy-to-use phone that plugs directly into your computer. So there's no need to wear headphones, buy a headset or have your conversation running through your loudspeakers. And with its small, compact size, you can take it anywhere you use your laptop and a Wi-Fi connection.

You simply dial the number you want using Skype™ and then talk normally with Multi-Link Perfectel Phone like an ordinary phone. Easy, crystal-clear - and for your ears only!

Key features:

- Easy to use, plug and play
- Connects directly to the audio connectors of your computer for easy access
- No installation required
- Provides privacy for all your Internet calls, as the main PC loudspeakers are muted
